

31st HEIDELBERG GRAND ROUNDS

Heidelberg Grand Rounds(HGR) “Ground Rules”

The HGR have been established as a forum to bring together basic scientists and clinicians. Distinguished experts present novel clinical and research findings and provide a comprehensive update in the respective field of oncology.

In addition to the high-ranking scientific and clinical presentations, the HGR also constitute a casual get-together, seasoned with drinks and refreshments, to foster a lively atmosphere for continued discussion.

Roman Thomas received his M.D. from the University of Cologne, Germany. After training as a physician-scientist with Volker Diehl in Cologne he joined the Cancer Genome Project at the Broad Institute (Cambridge, MA) working with Matthew Meyerson. Starting 2007, Dr. Thomas runs his own lab at the Max-Planck Institute in Cologne. He is also an associate member of the Center of Integrated Oncology in Köln. The Thomas lab hunts lung cancer genome alterations and seeks to functionally characterize such alterations.

James Peach is the Director of Stratified Medicine at Cancer Research UK. Previously at Cancer Research UK, he was seconded to the Department of Health in 2008 to lead on economic and financial aspects of the Cancer Reform Strategy, and later developed the charity's health strategy. Before Cancer Research UK, he was in

McKinsey's London healthcare team, advising NHS and pharmaceutical clients on strategy and commissioning. James studied at Oxford University and as an Entente Cordiale scholar at Science Po Paris.

Hubert Serve has been Head of the Department of Medicine, Hematology and Oncology at the Johann Wolfgang Goethe University since 2007, Scientific Director of the University Cancer Center Frankfurt (UCT) since 2008 and holds a W3 professorship at the Goethe University Frankfurt. His research is focused on molecular mechanisms of oncogenic signal transduction, molecular cancer therapies and the pathogenesis of leukemias and he is currently coordinating several research consortia, reflecting his belief in the importance of cooperating with national and international research groups.

Personalized Oncology

Prof. Dr. Michael Thomas

Thoraxklinik of University Hospital, Heidelberg

Lung cancer – Guidance in clinical decision making

Prof. Dr. Hubert Serve

Medical University Hospital Frankfurt, Dept. of Hematology, Oncology, Rheumatology and Infection

Flt3mutations: a good molecular target in AML?

Priv.-Doz. Dr. Roman Thomas

Max-Planck-Institute, University of Cologne
Dept. of Functional Cancer Genomics

Lung cancer genomics

Prof. Dr. James Peach

Stratified Medicine at Cancer Research UK, London

System strategy for personalized medicine

Personalized Oncology

Chairs:
Professor Dr. Christof von Kalle
Professor Dr. Dirk Jäger

November 22nd, 2011
16.00 – 18.00
Lecture Hall, DKFZ

NATIONALES CENTRUM
FÜR TUMORERKRANKUNGEN
HEIDELBERG

getragen von:
Deutsches Krebsforschungszentrum
Universitätsklinikum Heidelberg
Thoraxklinik-Heidelberg
Deutsche Krebshilfe

Please register by 21st November
at the latest.

*For this event, two points for
continuing education will be given
by the Landesärztekammer and
two AIO-Punkte will be given by
Arbeitsgemeinschaft Internistische
Onkologie.*

*Within the practical year, the points
will be recognized in the field of
internal medicine and surgery.*

Information and registration:
